

Michał Bialek

Backend Developer · Python, APIs & Integrations

michal.bialek@opoczta.pl +48 516 185 761 mbialek.dev github.com/poewer in/michal-bialek-a48891267
Lublin, Poland

Backend developer with 4 years of commercial experience building Python services, REST/SOAP APIs and back-end integrations. Hands-on with distributed workflows, message queues, IBM App Connect Enterprise, Kubernetes and CI/CD, and with integrating LLMs into production systems. Graduating BEng in Computer Science (2026).

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, TypeScript (Next.js), ESQL; academic: Java, C++
Backend & APIs	REST, SOAP, microservices, async processing, Sanic, Flask, Starlette, Node.js, RabbitMQ, Temporal, XML/XSD
Integration	IBM App Connect Enterprise 12, n8n, Microsoft Graph API
Infra & DevOps	Docker, Kubernetes / K3s, Argo CD, GitOps, GitLab CI/CD, GitHub Actions, Key Vault, Azure, Grafana, Linux
Databases	PostgreSQL, AlloyDB, Elasticsearch, Redis, InfluxDB, vector databases
AI & testing	LLM integration, AI agents, LiteLLM, prompt engineering, computer vision, Claude Code; unit and integration testing

EXPERIENCE

AI Developer · WeNet Group S.A. Remote · May 2026 – Present

- Develop Python APIs and microservices for an AI business-process automation platform (PostgreSQL, AlloyDB, RabbitMQ, Temporal); integrate LLMs and AI agents via LiteLLM.
- Co-build shared components used by other teams (authentication, reusable services, APIs) and integrate multi-team services into the core product.
- Deploy on K3s with Argo CD, GitLab CI/CD and Key Vault (GitOps); monitor production with Grafana; build selected Next.js features.

Python / AI Engineer · Iberion Remote · Oct 2025 – May 2026

- Developed backend services and API integrations; set up CI/CD with GitHub Actions and Docker deployments.
- Built LLM, computer vision and vector-search solutions; scaled content generation pipelines from ~100 to ~300 documents per day.

Python Engineer · Voltus Energy Remote · Oct 2025 – Jan 2026

- Developed backend services in a distributed architecture, integrated via RabbitMQ for scalability and load balancing.
- Optimized CPU and memory usage, wrote unit tests and monitored production performance.

n8n & Python Developer · Agentic Remote · Jan 2025 – Nov 2025

- Built Python microservices for automation (text-to-document, email processing) and workflow logic in Python and JavaScript.
- Created and optimized n8n workflows integrated with external services, including Microsoft Graph API; adapted LLMs for data classification and extraction.

Integration Developer / Python Developer · IBPM S.A. Remote · Jul 2022 – Aug 2025

- Built integration flows in IBM App Connect Enterprise 12 (ESQL) using SOAP, REST, message queues and XML/XSD transformations.
- Developed Python microservices (Sanic) with PostgreSQL, Elasticsearch and Redis; Docker, unit tests, Scrum.

SOA Developer · Grupa EFL Remote · Mar 2023 – Mar 2024

- Designed and implemented SOA integration flows in IBM App Connect Enterprise (ESQL) via SOAP, REST and message queuing.
- Transformed data with XML/XSD; tested integrations and took part in architectural reviews.

EDUCATION

BEng in Computer Science · WSEI University, Lublin 2023 – 2026

Thesis: IoT greenhouse microclimate control system (Python, MQTT, InfluxDB, Grafana, Docker).

Maria Curie-Skłodowska University · Lublin · Java, C++ 2021 – 2026

Languages: Polish (native), English (B2, professional working proficiency)
